AMAY KATARIA

(646) 761-5173 | Chicago, IL | jobs@amaykataria.com | Portfolio | LinkedIn | GitHub

SUMMARY

Pipeline-focused, multidisciplinary creative technologist building tools to integrate AI workflows into real-time 3D and web applications. Seeking roles to create AI-driven experiences using OpenAI SDK, ComfyUI, or novel blueprints in Unreal Engine.

Technical & Data Skills

Development	React • React-Native • Node.js • Python • Typescript • PostgreSQL
3D & Design	Unreal Engine • Blender • R3F (Three.js) • Spline • FreeCAD • 3D Printing
AI / ML	OpenAI SDK • LLM Fine-Tuning • ComfyUI • Stable Diffusion
Creative Coding	GLSL • Open Frameworks • Processing • P5.js • Touch Designer • VCV Rack • PureData
Design & Motion	Figma • After Effects • Illustrator • UI/UX Prototyping • Visual Storytelling
Hardware	Arduino • Raspberry Pi • Sensors • Custom PCB design
Cloud / Tools	AWS • Azure • Github • A/B Testing • Web Scraping • Data Processing

PROFESSIONAL EXPERIENCE

Extended Art Studio — **Chicago, IL**

Founder & Chief Creative Technologist — 2019 - Present

- Leading and managing a creative technology studio that delivers immersive experiences using cutting-edge technologies.

➢ ***Cine Fives*** *(documentation, website)* — 2026

- Built an **end-to-end pipeline** for Cine Fives, a web app that delivers personalized **movie recommendations** by combining TMDB API **filtering** with OpenAI SDK **ranking** algorithms to generate curated **top 5 suggestions** based on user preferences.
- Optimized API performance by implementing **intelligent precaching** that batches large result sets and reuses them across 3 consecutive rerolls, reducing response times by **50%**, while minimizing external API calls.

➢ ***Samsara*** *(documentation, GitHub)* — 2025 - 2026

- Engineered a **parametric Blueprint system** to procedurally arrange a **40-foot** Corinthian colonnade along a spline, reducing manual placement time by **95%** and enabling **rapid architectural iterations**.
- Developed a **multi-camera Blueprint system** for automating rendering of a **panoramic video** through ten perspectively correct **virtual cameras**, eliminating parallax distortion while maintaining **consistent lighting** and **exposure**.
- Created custom **Stable Diffusion pipelines** to **compose** 36 unique video segments, **style** with custom LoRA layers, **upscale** and **interpolate**, then **composite** in After Effects to achieve **visual coherence** across nine video panels in the installation.

Optikka — **Remote**

Senior Software Consultant — August 2024 – January 2025

- Developed a new **javascript library** for responsive **html canvas** drawing, resulting in **80%** faster design iteration time through a systematic **row-column structure**.
- Proposed a migration plan to a **mono repo architecture** for javascript modules, which reduced development time by **50%** and improved **code maintainability** through standardized versioning.
- Eliminated **critical bottlenecks** in the **renderer**, to improve **performance** for drawing multi-layered html canvases at **scale**.

Microsoft Corporation — **Seattle, WA**

Software Engineer II (Skype) — April 2023 – July 2017

- One of the **founding engineers** for architecting and developing the next generation of Skype client for iOS & Android platforms, used by over 300 million monthly active users.
- Helped architect and **open-source a new cross-platform library** called ReactXP to a community of over **2000 developers** on Github and within Microsoft.
- Conducted user research, led the software architecture, and **coordinated with over 6 team leads,** to integrate a brand-new accessibility framework into Skype, which allowed Microsoft to ship the app.
- Led the integration of **chat bot services** into the app's user interface and created a **Machine-Learning driven** coffee bot, which was **showcased by the Vice-President of Skype** at Microsoft's Build Conference in 2016.

EDUCATION

MFA, Art & Technology Studies, School of the Art Institute of Chicago — 2017 - 2019

B.S, Computer Engineering, Virginia Tech — 2008 - 2012

- CGPA: 3.84/4.0, Rank 6/126, Dean's list with distinction (all 8 semesters)
