AMAY KATARIA

(646) 761-5173 | Chicago, IL | jobs@amaykataria.com | Portfolio | LinkedIn | GitHub

SUMMARY

Performance-driven Web 3D Engineer building browser-based tools to integrate procedural environments into real-time web applications. Seeking roles to create real-time immersive web experiences using Three.js and agentic workflows.

Technical & Data Skills

Development	Next.js • React • React-Native • GLSL • Python
3D & Design	R3F (Three.js) • Spline • Unreal Engine • Blender
AI / ML	Claude Code • OpenAI SDK • ComfyUI • Stable Diffusion
Design & Motion	Figma • Google Stitch • After Effects • Illustrator
Creative Coding	GLSL • Google AI Studio • v0 • Open Frameworks
Backend / Cloud	Node.js • Supabase • PostgreSQL • AWS • Azure

PROFESSIONAL EXPERIENCE

Extended Art Studio — **Chicago, IL**

Founder & Chief Creative Technologist — 2019 - Present

- Leading and managing a creative technology studio that delivers immersive experiences using cutting-edge technologies.

➢ ***Whale Watcher*** *(documentation, Github)* — 2023

- **Led** a team of 2 to design and develop a **new immersive prototype** of a generative NFT art project on the web, which connects NFT art creators with their collectors.
- Won the **1st prize** for the Arts & Creatives category in the Blockchain Hackathon at ETH Chicago and received a **$2000 award** to develop the project further.

➢ ***The Lost Passage*** *(documentation, Github)* — 2021

- **Led** a team of 3 to conceptualize, design, and architect an **interactive swarm simulation** of 7000 artificial pigeons on the web, which got selected as one of top 3 projects in the program.
- Optimized using **custom GLSL shader** to animate a pigeon geometry with **blend shapes** to achieve a **60fps** animation.
- Exhibited the work in over **8 media art exhibitions** internationally with an attendance of more than 1000 participants.

Optikka — **Remote**

Senior Software Consultant — August 2024 – January 2025

- Developed a new **javascript library** for responsive **html canvas** drawing, resulting in **80%** faster design iteration time through a systematic **row-column structure**.
- Proposed a migration plan to a **mono repo architecture** for javascript modules, which reduced development time by **50%** and improved **code maintainability** through standardized versioning.
- Eliminated **critical bottlenecks** in the **renderer**, to improve **performance** for drawing multi-layered html canvases at **scale**.

Microsoft Corporation — **Seattle, WA**

Software Engineer II (Skype) — April 2023 – July 2017

- One of the **founding engineers** for architecting and developing the next generation of Skype client for iOS & Android platforms, used by over 300 million monthly active users.
- Helped architect and **open-source a new cross-platform library** called ReactXP to a community of over **2000 developers** on Github and within Microsoft.
- Conducted user research, led the software architecture, and **coordinated with over 6 team leads,** to integrate a brand-new accessibility framework into Skype, which allowed Microsoft to ship the app.
- Led the integration of **chat bot services** into the app's user interface and created a **Machine-Learning driven** coffee bot, which was **showcased by the Vice-President of Skype** at Microsoft's Build Conference in 2016.

EDUCATION

MFA, Art & Technology Studies**,** School of the Art Institute of Chicago — 2017 - 2019

B.S, Computer Engineering, Virginia Tech — 2008 - 2012

- CGPA: 3.84/4.0, Rank 6/126, Dean's list with distinction (all 8 semesters)
